

Shaurya Kumar

Full Stack Developer | Backend Developer

Ranchi, Jharkhand • +91 6200713833 • shauryak9113@gmail.com • linkedin.com/in/shaurya-kumar-1487aa365

PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer, Cloud Developer, and Startup Founder with hands-on expertise in production-grade backend systems, real-time infrastructure, cloud-native deployment, and secure authentication architecture. Co-Founder & CTO of GamerThred — a next-generation gaming infrastructure platform. Skilled in end-to-end product delivery: from system design and API architecture to responsive frontend engineering and automated cloud deployment. Passionate about distributed systems, low-latency real-time applications, and AI-integrated development workflows.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3
Frontend	React.js, Next.js, Tailwind CSS, Redux, Context API, Framer Motion, Responsive UI Engineering
Backend	Node.js, Express.js, REST APIs, JWT Auth, Middleware Architecture, Rate Limiting, Session Mgmt
Real-Time	Socket.io, WebSockets, Event-Driven Architecture, BullMQ, Low-Latency Systems
Databases	MongoDB, Mongoose, Redis (Caching & Sessions), MySQL, Firebase, DynamoDB
Cloud / DevOps	AWS EC2, S3, Lambda, IAM, Load Balancer, Docker, GitHub Actions, CI/CD Pipelines
Platforms	Vercel, Railway, Netlify, Clerk, Sentry, Stream.io, Inngest, Sevala
System Design	Scalable Architecture, Auth Infrastructure, Microservice-Ready Design, API Design Patterns
AI / ML	Prompt Engineering, AI Workflow Automation, Cursor AI, OpenCV, Scikit-Learn

SYSTEM DESIGN & ARCHITECTURE EXPERTISE

Scalable Backend Architecture	Modular controller-service patterns, horizontal scalability, stateless API design.
Authentication Infrastructure	JWT + refresh token rotation, OTP flows, Redis sessions, role-based access control.
Redis Caching Strategies	Session storage, rate-limit counters, cache invalidation, and performance optimization.
Real-Time Communication	Socket.io room management, event-driven pub/sub, WebSocket lifecycle handling.
Cloud Deployment Pipelines	AWS EC2/S3, Docker containers, GitHub Actions CI/CD, zero-downtime deployments.
REST API Design	RESTful conventions, versioning, error handling, middleware chains, Postman testing.
Event-Driven Architecture	Async workflows with Inngest, BullMQ job queues, decoupled service communication.
Microservice-Ready Design	Separation of concerns, independent service boundaries, scalable infra planning.

PROFESSIONAL EXPERIENCE

Co-Founder & CTO

Sep 2025 – Present

GamerThred — Remote

- Architected production-grade scalable backend for real-time gaming systems supporting multi-user authentication and session workflows.
- Designed secure auth pipeline — JWT, refresh token rotation, OTP verification, Redis sessions — reducing auth vulnerability surface.
- Built modular Node.js + Express backend with MongoDB and Redis; enforced rate limiting, middleware-based access control, and structured logging.
- Engineered real-time communication infrastructure using Socket.io, improving event delivery reliability for concurrent gaming sessions.
- Deployed cloud-native applications on AWS EC2, Railway, Vercel, and Netlify; automated deployments via GitHub Actions CI/CD pipelines.
- Integrated Sentry error monitoring, reducing debugging time through structured error tracking and production alerting.
- Led full technical roadmap — backend engineering, infrastructure planning, deployment automation, and architecture decisions.
- Stack: Node.js · Express.js · MongoDB · Redis · Socket.io · JWT · AWS · Docker · GitHub Actions · Sentry · Inngest

Freelance Full Stack Developer

2024 – Present

Independent — Remote

- Designed and delivered production-ready MERN stack web applications for clients with custom requirements.
- Built secure authentication systems, admin dashboards, and REST APIs tailored to client specifications.
- Developed responsive frontend interfaces with React.js and Tailwind CSS; deployed on Vercel and Netlify.

- Managed complete project lifecycle — requirement gathering, architecture, development, testing, and deployment.
- Delivered cloud-hosted applications with monitoring, uptime reliability, and post-launch support.

Software Developer

Prior Experience

InkHub Technologies — Ranchi, Jharkhand

- Built and maintained scalable full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Integrated AWS EC2 & S3 for cloud deployment; implemented Clerk-based authentication and secure user workflows.
- Developed real-time features with Socket.io and Stream.io; automated backend workflows using Inngest event queues.
- Deployed applications via Vercel, Railway, and Netlify with Docker containers and Git-based CI/CD pipelines.
- Integrated Sentry for production error tracking — improved application reliability and reduced issue resolution time.

Software Development Intern

Prior Experience

Codezeal Technology — Ranchi, Jharkhand

- Assisted in frontend development and responsive UI implementation using modern web technologies.
- Participated in complete development cycles: debugging, Git workflows, feature implementation, and code reviews.

KEY PROJECTS

GamerThred — Real-Time Gaming Infrastructure Platform

Node.js · Express.js · MongoDB · Redis · Socket.io · JWT · AWS · Docker · Sentry

- Production-grade JWT + refresh-token auth with OTP verification and Redis-backed session management.
- Real-time Socket.io communication layer with role-based access, rate limiting, and event-driven architecture.
- Cloud-native deployment pipeline on AWS with automated CI/CD; modular backend with secure middleware chains.

Chatify — Real-Time Messaging Platform

React.js · Node.js · Express.js · MongoDB · Socket.io

- Private real-time messaging with Socket.io, secure session handling, and fully responsive chat UI.

Instagram Clone — MERN Social Platform

React.js · Node.js · MongoDB · Clerk · AWS S3 · Stream.io

- Clerk-based auth, AWS S3 media storage, real-time social feed, and responsive modern UI.

Psoriasis Skin Disease Detection — AI/ML

Python · OpenCV · Scikit-Learn

- AI-powered disease detection pipeline with image preprocessing, feature extraction, and ML classification.

Bank Finance System — FinTech Application

Node.js · Express.js · MongoDB

- Secure financial transaction API, dashboard analytics, user authentication, and data management backend.

EDUCATION

Master of Computer Applications (MCA)

2025 – Present

Chandigarh University

Advanced Software Engineering · Cloud Computing · Distributed Systems · DSA

Bachelor of Computer Applications (BCA)

2022 – 2025

Usha Martin University, Ranchi

Software Engineering · Web Technologies · Database Systems · Networking · DSA

CERTIFICATIONS & ACHIEVEMENTS

- AWS Cloud Practitioner — In Progress
- Full Stack Web Development Certification
- Python for Beginners | Cloud Deployment & DevOps Fundamentals
- Architected production-grade scalable backend systems with Redis caching and JWT-based authentication.
- Built and deployed multiple real-time applications with Socket.io infrastructure for concurrent users.
- Led full technical architecture and engineering strategy as Co-Founder & CTO of a gaming startup.
- Delivered freelance client projects end-to-end — from requirements to cloud-deployed production applications.
- Applied AI-assisted development workflows (Cursor AI, Prompt Engineering) to improve team delivery speed.
